We were sent a new book to check out...

[Meet the Dooples by Dr. Lynn Hunter.](#)

This is the first book and we get to know the main characters that we will be reading about in other books... In Meet the Dooples, we meet Mr. Dooba Dee Doo. He is a wise old thing that helps bring the dooples to life...

There just seem to be a couple rules...  
Have fun exploring, learning and meeting new places and things...

BUT, they can only come out at night and have to be put back at the end of the day!!!

The characters are too cute...

We have Inky, Racer, Marky and others...  
Each one leaves their own creativity behind from the pencil sketches that Sketchy leaves to the marks on the box left from Marky...  
This book is colorfully illustrated and I love that the font is in a white box with basic font for young kids to read.

Meet the Dooples lets you use your imagination and creativity...

and I tell you, I am ready to read the next to see what new adventure they get to head on!

(I was able to use this book to tell Broxton that this book shows us how pens, pencils, crayons and markers are learning their creativity at night to be able to help him learn to write and draw!!!)
